

# Uniting APAC rail leaders to discuss new digital paradigms shaping the future of rail

Asia Pacific Rail returns for its 20th anniversary edition on 20-21 March 2018 at HKCEC, Hong Kong. The event brings together the leading rail leaders from across APAC and beyond to discuss and demonstrate innovations, technologies and strategies that are shaping the rail industry.

## Industry best practice sharing

The two-day event will feature over 130 international speakers and industry experts from leading rail asset owners and partners. Through industry best practice sharing, case studies and panel discussions, they will explore the latest

developments in rail projects across the region, as well as the new digital paradigms shaping the future of rail.

## Focus on key priorities

Key highlights of the event include the exclusive keynote interviews conducted

20-21 MARCH 2018

HONG KONG

by Richard Anderson, Managing Director of the Railway and Transport Strategy Centre at Imperial College London. He'll be sitting down with Lincoln Leong, Chief Executive Officer of MTR Corporation, Jeroen Weimar, Chief Executive Officer of Public Transport Victoria and Abdul Mohsin Ibrahim Younes, Chief Executive Officer of the Rail Agency, Roads and Transport Authority (Dubai) to find out more about how they are planning to manage growing passenger capacity needs and operational demands. In the following panel discussion, these leaders will talk more about how they see the rail industry being disrupted and the key priorities they will be focusing on in the coming years. Furthermore, Rolf Härdi, CTO of Deutsche Bahn AG and Edgar Sée, Project Director – Line 4 Automation at RATP will also be keynoting on some of the digital railway transformations that Asian Metros can adopt.

Across eight theatres of content at its largest ever edition, Asia Pacific Rail 2018 attendees will discover answers to their challenges in disciplines including:

- Operations and asset management
- Signalling and communications
- Track infrastructure and maintenance
- Rolling stock
- Safety
- Project management
- Automated ticketing systems

## COMPANY PROFILE

### Integrated solution for rail and transport companies

Supplier of software solutions for rail freight and passenger services, the display by zedas® at Asia Pacific Rail 2018 will feature its latest functions. This complex solution provides rail and transport companies with integrated rail transport management, connecting the processes of shunting and long-haul logistics, as well as the maintenance and synchronisation of rail infrastructure and vehicle fleets. 'zedas®asset' enables the user to monitor the condition of infrastructural networks and vehicle

fleets, and to control the efficient deployment of maintenance resources. The solution evaluates the operating data obtained from online diagnostics or inspection, and enables forecasts to be made about asset behaviour. Rail transport companies, operators of works and port railways, and the providers of shunting services can use 'zedas®cargo' to manage, control, monitor and document all kinds of rail freight transport, from the signing of contracts to planning, operation and invoicing.

Stand number: F19
